The Construction Cost Estimate is an opinion of probable construction costs that may be provided as part of a project. In providing opinions of probable construction cost, it is recognized that neither the Owner nor Commstructure has control over the cost of labor, equipment or materials, or over the Contractor's methods of determining prices or bidding. The opinion of probable construction cost is based on Commstructure's professional judgment and experience and does not constitute a warranty, express or implied, that the Contractor's bids or the negotiated price of the Work described in the Study will not vary from the Owner's budget or from any opinion of probable cost.
