

Dear Nick Green.  
I am contacting you in regards of recycling. I grew up in Arizona and came to Grant County every summer, plus lived in John Day. I graduated in the class of 2019. I was very active in school! You might of heard of me from sports, working at the Dayville Cafe, or maybe just even heard of me. Growing up in Arizona, i was raised with having a recycling and waste bin. Living in Grant County i noticed we have waste but no recycling. Recycling is such an important act that we can give back to our world. It saves energy, offers jobs, reduces landfill spaces, and conserve raw materials. For many of us in John Day we do not even know the damage not recycling can cause. I want to make sure as a young adult i can make a healthy change to society that will not even help my life span but for continous generations. For the future i would like this situation to be addressed. I want it to be voiced in the next town meeting. I would like a thought of a plan to implement recycling in our community. I would like to see a change and would love to be apart of it. Thank you for your time!

sincerely,

Alexi Moore
