CITY

was very surprised as  
when the water sewer bill  
came, I pay bill pay  
monthly and pay early to  
assure I don't have a late  
payment.

\$100.00 is ridiculous!!

Charged for water + sewer with  
very little usage and then  
charged added in the summer  
to prevent fire + garden grazing  
food for family + friends is  
even more ridiculous.

In 2016 the bill was  
\$75 per month \$25 increase in  
6 years. Looking back in 2008  
my water/sewer bill was @46 average.

At what point is this  
expense going to level out?  
(over)

I hope the \$100.00/month is going to remain all 12 months regardless of usage. It truly is high way robbery to pay \$100 for less than 800 usage for 8 months and then get reamed.

Water prices by state - 2021 -

Oregon \$37 per month. "the average person uses about 85 gallons of water per day average of \$35/month

World population State rankings -

1/1/2020 rate for sewer \$48<sup>00</sup>

City of John Day Resolution 20-829-02

\*  $39 + 48 = \$87$ /month -

1/1/2020 rate for water  $33.00 + 6 = 39<sup>00</sup>$

resolution 20-828-01

Finally, Covid and people out of work and the city jacks up the utility bill.

I'm appalled.
